SKILLS AND EXPERTISE

- Strong Logical Thinking & Problem Solving
- Proficient in Software Debugging & Testing
- Computer Programming (Experienced in HTML, CSS, JavaScript, React, Node.js)
- Coding & Algorithm Development
- Web Development (Frontend & Backend using React, Node.js)

LANGUAGES

- English (Fluent)
- Urdu (Fluent)
- Hindi (Fluent)

EDUCATIONAL HISTORY

Pre-Engineering – Government College Kali Mori,Hyderabad

2024 – Present

- Focused on mathematics, physics, and computer science. Participated in programming-related class projects.

BS Software Engineering (Planned) – MUET

(2026 – 2030)

- Plan to pursue a Bachelor's in Software Engineering after completing pre-engineering

PROJECTS

React Calculator

- Built a responsive calculator in React supporting basic arithmetic operations with smooth user interaction.
- Designed a clean, mobile-friendly UI using CSS and media queries for cross-device compatibility.

Weather App

- Created a Weather App using React and integrated a weather API for real-time data fetching.
- Implemented a clean user interface to display weather conditions, temperature, and forecasts in different cities.
- Utilized React hooks for state management and Axios for API calls.

Todo List App

- Built a dynamic todo list application using React with features to add, complete, and delete tasks.
- Implemented state management using React hooks to update the task list in real-time.
- Stored tasks in browser LocalStorage to persist data across sessions.
